OBJECTIVE

Cybersecurity professional with practical exposure to security operations, threat analysis, SIEM platforms, and vulnerability management. Adept at independently analyzing security problems, coordinating responses, and improving operational security processes. Combines strong technical knowledge with problem-solving, adaptability, and effective communication to support organizational security objectives.

ACADEMIC QUALIFICATIONS

M.Sc. Cyber Security – 7.9/10 CGPA — 2022 - 2024
Bharathiar University — Coimbatore

EXPERIENCE

Cyber operations L2 – Full time

RndOptimizAR Private Limited — Coimbatore
Nov 2024 – Present

- Configured network security monitoring using Zabbix agents with SNMP to track CPU, memory usage, and other system metrics.
- Managed SIEM operations using Wazuh, including server maintenance, log analysis, integration with third-party tools, rule creation, threat detection, and generation of security reports.
- Conducted Vulnerability Assessment and Penetration Testing (VAPT) on internal websites to identify and exploit security flaws.
- Gained hands-on experience with a wide range of security vulnerabilities and attacks.
- Implemented MISP Server for centralized threat intelligence sharing, integrated multiple data feeds, and automated correlation of indicators of compromise (IOCs)
- Implemented a local RAG server using open-source AI models to automate document-based tasks while ensuring data privacy and offline processing.
- Automated Wazuh detection and email alerts for suspicious activity and brute-force attacks using n8n, with wazuh Active Response to automatically block malicious IPs.

Penetration tester - Intern

HackersForYou — Remote

Feb 2024 – May 2024

- Actively participated in 40 plus hours of dedicated learning sessions, mastering advanced web exploitation techniques and red teaming methodologies.
- Working with real time applications and identifying bugs.
- Resolve the bugs and mitigate for the bugs.

SKILLS

• Network Security • Log Analysis • Web Application Security Testing

• Information Security • Risk Assessment • Vulnerability Assessment & Penetration Testing

• Incident Response • Malware Analysis • Firewall & IDS/IPS

PROJECTS

Project -YARA Integration and Wazuh Unite Against Malware, Vulnerabilities, and Brute Force Attacks

- Using Yara tool Creating the sample malware using the bash script and testing the malware in Linux and generating the alert in wazuh dashboard.
- Testing the vulnerabilities in own system and generating alert in wazuh dashboard.
- Doing brute force attack on the system and high-level alert generating in wazuh dashboard

CERTIFICATIONS

1. Certified ethical hacker V12 — **EC-Council**
2. Cyber Security & Privacy — **NPTEL**
3. Network Analysis — **Blue Team**
4. SIEM Foundation — **IBM**
5. Networking Basic — **CISCO**
