Profile

Cybersecurity professional with 2 years of experience in security operations, SIEM monitoring, threat analysis, vulnerability assessment, and security automation. Hands-on experience with Wazuh, network monitoring, threat intelligence, VAPT, and local AI-based document automation. Currently working as an L2 Cybersecurity Analyst, focused on improving detection, response, and operational security.

Skills & Tools

– **Security Operations & SIEM:** Wazuh, log analysis, detection rules, incident triage, security reporting
– **Monitoring & Threat Intelligence:** Zabbix, SNMP, MISP, IOC correlation, threat feeds
– **Vulnerability Assessment:** VAPT, Nmap, Nessus, Burp Suite, Metasploit, web security testing
– **Detection & Response:** File Integrity Monitoring, YARA, brute-force detection, Wazuh Active Response
– **Automation & AI:** n8n workflows, email alerts, Python basics, Bash, local RAG, open-source AI models
– **Networking & Analysis:** Wireshark, network security, malware analysis fundamentals

Work Experience

Cyber Operations L2 / Cybersecurity Analyst — RndOptimizAR Private Limited | Nov 2024 – Present
– Operate Wazuh SIEM, including server maintenance, log analysis, rule creation, third-party integrations, threat detection, and security reporting.
– Investigate security incidents using the NIST SP 800-61 incident response process and map relevant tactics and techniques to the MITRE ATT&CK framework.
– Configured Zabbix monitoring with SNMP to track system availability, CPU, memory, and other infrastructure metrics.
– Conduct VAPT on internal websites to identify security weaknesses and support remediation.
– Implemented MISP for centralized threat intelligence sharing, integrating feeds and automating IOC correlation.
– Built a local RAG server using open-source AI models to automate document-based tasks while keeping data within the local environment.
– Created n8n workflows for Wazuh suspicious-activity and brute-force email alerts; configured Wazuh Active Response to automatically block malicious IPs.
– Trained and mentored 3 junior analysts through structured knowledge-sharing sessions on Wazuh, Zabbix, MISP, and VAPT.

Penetration Tester Intern — HackersForYou | Feb 2024 – May 2024
– Completed hands-on learning and practice in web application exploitation and red-team methodologies.
– Tested real-world applications in authorized scopes, identified vulnerabilities, and documented findings with remediation guidance.
– Used Burp Suite, Nmap, Nessus, and subdomain discovery utilities during testing.

Projects

YARA + Wazuh: Malware, Vulnerability & Brute-Force Detection
– Created test malware samples with Bash in a controlled lab and validated YARA-based detections through Wazuh alerts.
– Simulated vulnerabilities and brute-force activity in a lab environment and reviewed resulting alerts in the Wazuh dashboard.

Local RAG & Security Automation
– Implemented private, local document Q&A/automation with open-source AI models; automated security notifications and malicious-IP blocking workflows.

Education

M.Sc. Cyber Security — Bharathiar University, Coimbatore
2022–2024 | CGPA: 7.9/10

Certifications

– Certified Ethical Hacker (CEH v12) — EC-Council
– Cyber Security & Privacy — NPTEL
– Network Analysis — Blue Team
– SIEM Foundation — IBM
– Networking Basics — Cisco
